Subject: Invitation to free online training – “Improve hitting through fact-based analysis!”

Dear Friends,

One of the main goals for WBSC Europe is to raise the level of play and competitiveness of European baseball in global level. Together with our partner, Blast Motion, today we are announcing our latest building block, which will help coaches around Europe to analyze, correct and teach their players on hitting much more effectively. This building block is free online training course for European coaches.

WBSC Europe would like to ask all national federations to pass this information to all baseball coaches at your country as widely as possible. We do hope that coaches across Europe will take advantage of the free training provided by Blast Motion, the # 1 swing analyzer of MLB.

This first online coaches training session will help coaches to do fact-based analysis on their players hitting capabilities during their transition, swing, and impact phases. During the training coaches will learn to analyze their players and use the analysis to correct and optimize players techniques. Training will also give coaches all needed tools to follow their players training and development to make sure they are working on proper techniques and get most out of their capabilities.

Blast motion will also demonstrate the proper usage of their tool, which is official swing analyzer of WBSC Europe. European federations and teams will have opportunities to purchase Blast tools at special discounted pricing.

Lastly, Blast Motion will be in attendance at the WBSC Europe Congress and available for meetings and discussions.

Online training sessions and introductions to the Blast Solution will be arranged via the link below. Please RSVP here: <https://calendly.com/kyleatt1>

Yours sincerely,

Ami Baran
WBSC Europe Secretary General
